Reviewed and provided feedback on FACCC's proposed AI Usage Policy

- Generally, the committee didn't like the policy draft; they found it punitive in nature and didn't understand its purpose.
- It mentioned staff, and this is a member's committee. A separate policy for each?
- How would the 80% originality be determined and enforced?
- Possibly a writer's guide or publishing guide may be more appropriate.
- The committee agreed it was essential to be cautious of bias in AI, ensure that its use is being critically evaluated, and that authors should cite the tools they use
